In addition to innovative bulk fiber optic cable, Cleerline Technology Group's complete solutions now include media extension supplies!

Cleerline Media Extenders support Gigabit Ethernet, allowing high quality signal distribution from fiber to RJ45 connections or from SFP to SFP. Extenders feature empty SFP slots, making customization for single mode or multimode fibers possible. Select models also support PoE+!

For difficult environments like those seen when extending networks to locations like gates or outbuildings, Industrial Switches are ruggedized, with an IP40 rating and operating temperature of -40~+75°C. Industrial Power Supplies are available for use with the Industrial Switches.

**MEDIA EXTENDERS - POWER SUPPLY INCLUDED**

Industrial Switches require an external power supply (sold separately).

SSF-1x2-RUGGED & SSF-1x4-RUGGED require a 60W Power Supply: SSF-DIN-48V60W-PS.

SSF-1x4POE-RUGGED requires a 120W Power Supply: SSF-DIN-48V120W-PS.
To match Cleerline’s Media Extenders, the new product line features a variety of SFP transceiver modules. Options for single mode and multimode fibers are included in the new product offering, with support for 1Gb (SFP) and 10Gb (SFP+) transmissions.

Within the SFP line, BiDi Single Mode SFPs (A and B modules required) allow bidirectional transmission over one strand of single mode fiber.
