

SINGLE-USE FACE SHIELD

The Dynatomy Single-Use Face Shield is a **lightweight, disposable, cost-effective product that provides comfortable coverage.**

The CDC recommends using face shields when additional protection is needed to safeguard the face from infectious agents. For use in protecting the face, mouth, nose, and eyes.

Each shield consists of 1 ply of 7 mil transparent film whose durability is ideal for face shields.

D'Addario, the world's largest manufacturer of musical accessories, has converted their Evans drumhead factory on Long Island into a facility that can mass produce these face shields utilizing the film from their G2 drumheads.
