

Planet Waves Port Savers solve the problem of connecting HDMI to today's thin panel displays. Port savers are an instant fix for depth, angle, and attachment difficulties!

Port Savers are now available to support full 4K 18 Gbps HDMI High Speed with Ethernet. They are a perfect addition with any of our Ultra High Speed or "E" Series HDMI cables, allowing for easy hookup and disconnect.

Available in three different male angled variations on one end. Each has a female HDMI connection on the other end.
