

With Planet Waves Link Control Cables, serial control connections from your AV system's output ports to your display or device are simplified!

Input ports are provided on many of today's most popular displays, such as Samsung Ex-Link and others.* Planet Waves Link Control Cables allow fast and easy serial connections to your input control port from many of the most popular control systems, including Savant, RTI, Control4, AMX, and more! RS232 and Serial connections have never been easier than with Planet Waves Link Control Cables.

*Note: Prior to any installation, always confirm your device input control type and pinout.

Pinout of your particular system controller model and appropriate PW-LINK cable configuration must also be confirmed prior to installation.

PW-LINK cable pinouts are provided on this sheet and with every PW-LINK cable or kit.

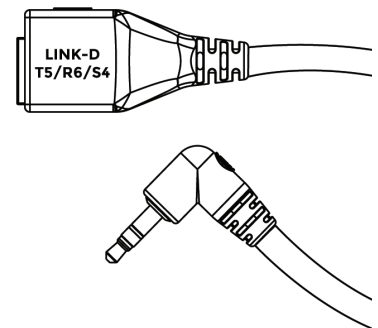

Part Numbers	Description
PW-LINKD	Link Display-Side Cables
PW-LINKKIT	Link Cable Kit including PW-LINK-C, PW-LINKD Cables, DB9 to RJ45 Adapter

PW-LINKD DISPLAY SIDE CONTROL CABLE

The PW-LINKD cable allows ease of direct control input to your display or other device's control input. Use for 232 serial input from many of today's most popular control systems, including Savant, RTI, and others.*

*Always verify compatibility and system pinout.
